You will be with role-based training.

From the executive suite to the maintenance team, the medical staff to the registration desk, your staff members make decisions each day that could put your organization at risk.

Our brand new *HIPAA and Compliance Training Libraries* deliver online learning that is targeted to your staffs' individual needs and demonstrate through realistic scenarios how they should behave in situations they may encounter at any time.

The courses in the *HIPAA Privacy and Security Library* explain HIPAA requirements for privacy and security and cover workplace practices that protect patient privacy and ensure security of confidential information.

The courses in the *Compliance Library* cover false claims, HIPAA privacy and security, the Anti-Kickback Statute, and more.

Our HIPAA and Compliance Training course design features:

Real-world case scenarios that staff members encounter every day. Our editorial team worked with compliance and privacy professionals and hospital employees across the country to identify the essential components and role-based scenarios for effective compliance and HIPAA training.

"Test Your Knowledge" exercises with remediation to help staff truly understand the material each step of the way. Learners can't proceed until they succeed.

Documentation of staff participation through the post-course test to demonstrate employees' understanding of the material.

Second year advanced training for ongoing education needs.

Each track contains training for:

- Physicians
- Nursing and Clinical Staff
- Coders/Billers and HIM Staff
- Administration/Corporate Staff
- Registration/Front Office Staff
- Environmental and Nutrition Services Staff

Why HCPPro?

It's role-based:

It's the right way to train—that's why the OIG recommends it.

It's built on experience:

Hundreds of thousands of healthcare professionals have trained using HCPPro's compliance and HIPAA products.

It can be customized:

These courses are designed with your customization needs in mind so you can educate staff on your organization's policies and guidelines.

It's portable:

Use it on your learning management system or track and manage your learners on our system.

It's blended learning:

Use the elearning library in conjunction with HCPPro's award-winning videos, handbooks, and audioconferences for a comprehensive training program.

Why is compliance important?

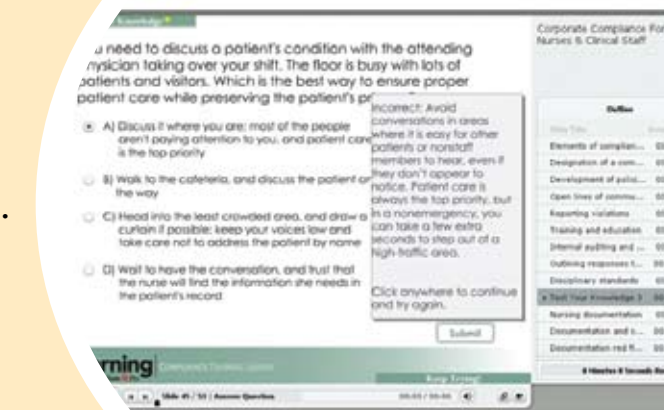

By designing and implementing a compliance program, your hospital has demonstrated its commitment to comply with all applicable rules and regulations.

Compliance programs help:

The bottom line: Doing the right thing is good business because it reduces risk.

elearning Connected. Trusted. Done.
